

HI-RAD L G4

SERVICE INSPECTION CAMERA

ahlbergs.staging.westart.se/products/cameras/hi-rad-l-g4

The HI-RAD L G4 camera represents the state of the art in image quality, color reproduction, and radiation tolerance.

Each model comes with advanced features, including 100x zoom, precision auto-focus, full 1080p resolution, and integrated pan/tilt functionality.

For many years, the HI-RAD series has demonstrated unmatched reliability and performance in the most demanding environments, supporting a wide range of critical applications. With the new Generation 4, you can expect even greater image quality, enhanced performance, and optimized capacity.

MORE INFORMATION ABOUT HI-RAD L G4

SPECIFICATIONS

APPLICATIONS

- Bottom Nozzle Inspection
- S/N Identification
- Fuel Inspections
- FOSAR- Foreign Object Search and Retrieval
- Spent Fuel Pool Inventory

APPLICATIONS

- Gap Checks
- Real Time Core Verification
- ISI Code Exams
- Decommissioning
- Jet pump inspections

BENEFITS

- More Robust Design
- Reduced Weight & Size
- Higher Resolution
- Improved Recall Position Accuracy

BENEFITS

- Increased Pan/Tilt Precision
- Ergonomical Design for Easy Handling
- Optional Shock Absorption Pads

We reserve the right to alter specifications without prior notice

- Can be operated while suspended by cable only
