

LPU415

POWER UNIT FOR AHL-LIGHT 10

ahlbergs.staging.westart.se/products/lights/lpu415-4

The LPU415 is a high-performance light power unit designed specifically for the Ahlberg Cameras LED Light AHL-LIGHT 10 that is used with the 4-Face-system and similar setups.

The LPU400-series offers up to 4 channels of seamlessly controllable light outputs. The outputs are controlled by front-panel-mounted control knobs. The outputs work with a constant current design, meaning that the system adapts to power loss in cables and enables the LED lights to perform with max efficiency.

MORE INFORMATION ABOUT LPU415

APPLICATIONS

- Power and control unit for the lights AHL-LIGHT 10.

BENEFITS

- Wide band of the power supply input 120 to 240 V AC, 50/60 Hz.
- Individually controlled outputs for up to four units.
- Outputs are short-circuit-, over-current-, and over voltage protected.

SPECIFICATIONS

PHYSICAL CHARACTERISTICS

Width	483 mm
Length	375 mm
Height	88 mm
Weight	5.3 kg
Housing material	Powder coated aluminium

POWER

Input Voltage	100-240 VAC / 50-60Hz / 520 W
